I'm using Redis 2.8, python 2.7, and the latest version of the redis-py module. My problem is that there's a specific structure that I can't find in the documentation. For example, I'm trying to use a set. Here's an example of the thing I'm trying to do: > redis-cli 127.0.0.1:6379> hll test 1) "hash" 2) "hash" 127.0.0.1:6379> zadd aa:1 test 123 (integer) 1 127.0.0.1:6379> zadd bb:2 test 123 (integer) 1 127.0.0.1:6379> zadd ccc:3 test 123 (integer) 1 127.0.0.1:6379> zadd ddd:4 test 123 (integer) 1 127.0.0.1:6379> zadd eee:5 test 123 (integer) 1 127.0.0.1:6379> zadd fff:6 test 123 (integer) 1 127.0.0.1:6379> zadd ggg:7

15/12/2020: You can use the published version as well. The installer will find the correct version of Acrobat and ask if you want to install or uninstall. 15/12/2020: Just remove all previous versions of the Adobe Acrobat and Reader completely and download the latest version. You can safely ignore the dialog that says that the update will cost \$89, and you don't need to purchase your software separately, as the update is included with the Adobe Acrobat and Reader. MSI is the only one that has worked for me. After I installed the MSI, my Acrobat Adobe account was automatically restored. I could then log into Adobe and accept the User Agreement and install Acrobat for free. (30/10/2019) This method does require some knowledge of Windows Installer and the Acrobat folder. (21/03/2019) There are two ways to accomplish this, but the first method is the recommended one. Newer versions of Windows are faster at uninstalling or un-updating these programs as they no longer have the "slowness" of the older versions. Important note: The key file is downloaded from a third-party site and not the official Adobe site. As such, the key is the property of the person who created it and you should not distribute the key for any reason. (16/04/2018) MSI: You can download an updated MSI file from Adobe that contains the missing function of the Amtlib.dll. This will probably cause a lot of problems, because it's not the official MSI file. The latest Adobe Acrobat (up to and including Acrobat XI Pro and the one for Microsoft Windows (versions 32-bit and 64-bit)) can be downloaded from the official Adobe web site. It's likely that the official file will have been updated to fix this problem. Why does this happen? Adobe occasionally updates certain files in their applications. In this case, they update a file called Amtlib.dll. In the past, users could edit this file in order to bypass the error dialogs, because the fix was just a few lines of code. (14/04/2017) On one computer, the user installed the latest version of Adobe Acrobat and the latest version of Adobe Acrobat Pro using the Windows Installer. After installation, the programs could not find the required Amtlib.dll (or amtlib.dll). The 2d92ce491b
